

MOHAMMED BASIL MAHMOOD YUNUS

General Land Surveyor

Jeddah, Saudi Arabia

Phone: +966544883336 | Email: ss.guess@hotmail.com

Saudi Council of Engineers Member: Technician, Surveyor General (Since 2018)

PROFESSIONAL SUMMARY

GENERAL LAND SURVEYOR WITH 12 YEARS OF FIELD EXPERIENCE IN LAND SURVEYING ACROSS CONSTRUCTION,

municipal, and engineering consultancy projects in Saudi Arabia. Proficient in Total Station, GPS, GNSS/RTK, Level, AutoCAD, Excel, and GIS platforms.

Specialized in construction survey, setting out, topographic survey, as-built documentation, control points establishment, and QA/QC compliance. Proven ability to deliver shop drawings, red line verification, and coordinate systems (UTM) data for residential, infrastructure, and municipal developments. Active SCE member with strong HSE awareness and bilingual communication (Arabic/English).

CORE SKILLS

HARDWARE: TOTAL STATION, GPS, GNSS, RTK, LEVEL, CONTROL POINTS INSTRUMENTS

Software: AutoCAD, Excel, GIS Platforms, Municipal Submission Systems

Survey Types: Setting Out, Topographic Survey, As-Built Survey, Construction Survey, Land Subdivision, Boundary Demarcation, Coordinate Systems, UTM

Deliverables: Shop Drawings, Red Line Verification, Technical Reports, Plan Preparation, QA/QC Documentation, HSE Field Compliance

PROFESSIONAL EXPERIENCE

GENERAL SURVEYOR

Farasan Islands Municipality, Jazan, Saudi Arabia

2025 - Present

- Executed surveying works for 1,400+ residential plots using GPS and Total Station, supporting municipal planning and GIS integration objectives.
- Prepared complete AutoCAD drawings and technical plans aligned with municipal standards and submission requirements.
- Uploaded survey plans to Jazan Municipality GIS platform, ensuring accurate coordinate systems and data integrity for municipal records.
- Conducted topographic survey and setting out activities for residential development zones under municipal supervision.
- Delivered construction survey documentation with QA/QC checks before official plan submission.

General Surveyor

Manate Al-Amah General Contracting Company, Abha, Saudi Arabia

2024 - 2025

- Performed construction survey and setting out for 20 residential villas under

Ministry of Housing programs, meeting project schedule and accuracy targets.

- Established building survey control points and verified shop drawings against approved design coordinates using Total Station.
- Prepared as-built survey records and technical reports for consultant review and project handover documentation.
- Coordinated field measurements with engineering teams to maintain red line compliance and construction survey accuracy.
- Supported QA/QC processes for survey deliverables on active construction sites.

General Surveyor

Mahra General Contracting Company, Jeddah (Al-Khomrah), Saudi Arabia

2023 - 2024

- Led a survey team of 4 surveyors on multi-villa housing projects, ensuring on-time delivery of setting out and plan documentation.
- Executed construction survey works for 48 residential villas under Ministry of Housing requirements using Total Station and GPS.
- Read and interpreted building survey points and structural plans to support accurate field layout and coordinate systems alignment.
- Produced AutoCAD survey drawings and as-built documentation for consultant approval and project closeout.
- Maintained HSE standards and QA/QC procedures during field operations on active construction sites.

General Surveyor

Al-Amjad Engineering Consultancy Office, Jazan (Al-Darb), Saudi Arabia

2020 - 2023

- Conducted land subdivision, boundary demarcation, and deed application surveys in compliance with Saudi land regulations and municipal requirements.
- Performed topographic survey and setting out for residential and commercial projects using Total Station, GPS, and Level instruments.
- Uploaded engineering plans to municipal and government platforms (Etmad, Balady) for official review and approval workflows.
- Prepared technical survey reports, shop drawings, and coordinate systems documentation for consulting project deliverables.
- Collaborated with engineering teams to verify red line boundaries and construction survey accuracy before plan submission.

General Surveyor

Abdul Karim Engineer Consulting Company, Jazan (Al-Darb), Saudi Arabia

2013 - 2020

- Executed land subdivision, boundary demarcation, and deed registration surveys for residential and agricultural land parcels across southern region projects.
- Performed topographic survey, control points establishment, and setting out using Total Station, GPS, and Level for consulting assignments.
- Analyzed survey data and prepared technical reports and AutoCAD drawings for municipal and private sector clients.

- Delivered project plans on schedule through effective coordination with field crews and engineering consultants.
- Maintained QA/QC standards for all survey deliverables including as-built documentation and coordinate systems verification.

EDUCATION

TECHNICAL DIPLOMA - SURVEYING SPECIALIZATION

Technical Thrift Gap Institute, Al-Faisaliah District, Jeddah, Saudi Arabia
2017
